DATASHEET

**EPSON ULTRACHROME**  
**D6 INK**

Designed for high-quality photo print production, the Epson SureLab SL-D3000 is a 6-colour, compact digital dry lab. It utilises Epson's proven Micro Piezo printhead technology, in conjunction with Epson's original ink and LUT, to deliver accurate reproduction and a maximum resolution of 1440 x 1440dpi.

Building on Epson's success in large format printing, the SL-D3000 offers a print quality and colour consistency comparable to that of Epson's professional graphics printers. This means output will appear consistent to customers, giving companies the flexibility to work with a wider range of sizes and print run lengths by using the SL-D3000 in conjunction with another Epson printer.

Giving users the flexibility to produce a variety of materials between 4 and 12 inches wide, the SL-D3000 can print photos, cards, invitations, flyers and promotional leaflets on dedicated glossy, lustre and matte paper. The dual-roll model allows two different media types and/or roll widths to be loaded simultaneously for improved versatility and productivity.

Epson's UltraChrome D6 6-colour photo ink-set achieves a wide colour gamut that exceeds that of silver halide, yielding prints that are vivid and lifelike with excellent black density.

The power-efficient SL-D3000 uses significantly less energy than a wet lab, reducing impact on the environment and the total cost of ownership. Further lowering the cost per print, the printhead and LUT are carefully configured to use ink economically while maintaining the best print quality.

Setting up print jobs is easy using the optional 'Order Controller' software, which includes basic photo re-touching. The SL-D3000 begins printing quickly without the need to warm-up chemicals, and can automatically move finished prints to an optional A4 job sorter. The only regular maintenance required is consumables replacement and dusting. When space is at a premium, the compact SL-D3000 can be positioned in a corner, as it is operated from two adjacent sides, or it can be moved around on its wheels.
